

New LED Cob Light Incentive from Focus on Energy

LED cob lights have been around for many years now. Though relatively expensive, they can be an economical alternative to purchasing a complete new LED fixture. And some people have had great success retrofitting exterior HID fixtures with LED cob lights, however, they did so without receiving an incentive. Until now that is. Beginning in 2017 Focus on Energy is offering prescriptive incentives for DLC listed exterior mogul screw-base (E39) LED lamps. The LED lamps can be used to replace HID lamps found in outdoor pole/arm-mounted area and roadway luminaires (fixtures), outdoor pole/arm-mounted decorative luminaires, outdoor full-cutoff wall-mounted area luminaires as well as parking garage and fuel pump canopy luminaires. The replacement lamps must be installed in the luminaire they are DLC listed under (i.e. outdoor pole/arm-mounted area and roadway luminaire, etc.).
